Enjoy your musicaltrades.com **Guitar Chord Tabs Charts**. I hope you find them useful. Chord Tabs can be viewed by [Scale](#) or by [Key](#). For further explanation of interpreting string tablature, review the [string tablature section](#) of musical notation on the website.

How to Interpret Chord Tablature

- ① Red dots on lines indicate where string is pressed.
- 1 White numbers on red dots indicate finger to use.
- 2 - Numbers beside chord tab indicate chord starting fret.
- x - Above the chord tab: Do not play the string.
- o - Above the chord tab: Play the string open.

fyi There are countless variations of chords for any instrument of the major and minor scaling system. Composers and performers alike often apply combinations of chords and/or chord sevenths creating appoggiaturas and other tone effects in their music. The tabs posted include all of the standard chords through the fourteenth fret.

The chord tabs on this page are displayed in scale progression up the fretboard. In this way, it is easy for you to see the common occurring fingering patterns as they climb the fretboard. Once you know the pattern, you can simply transpose it along the fretboard. This illustration of the chords is helpful in recognizing the fingering patterns and identifying the chords when sight reading or playing an instrument. Refer to the Key of Scale charts for specific key groups. For more info on interpreting string tablature, review the [string tablature section](#) in notation.
